

# LAB 850

In the world of foundry patterns there is red board and then there is what we call **LAB 850**. Axson developed the premium red board on the market in Europe and is now available through out the United States, manufactured right in Eaton Rapids Michigan.

**Lab 850** is ideal for high quality pattern work and detailed requirements. Its surface aspect and ability to hold that tight edge that our customers require.

Need a great slab for packing sand around...  
look no further than **Lab 850**.

**Lab 850 features:**

- Machines Easily
- No Dust, Only Chips are Created
- Extremely Smooth Surface When Finished
- Excellent Compression Strength
- Good Abrasion Resistance
- Good Impact Resistance
